Linda M. Christle, CECD, Executive Director
Economic Development Sedalia-Pettis County
3616 West Broadway, 3rd Floor
Sedalia, MO 65301

Ref: Sedalia Thompson Meadows Industrial Park Certification

Dear Linda;

On behalf of the Technical Review Committee, please accept my congratulations on the selection of the Thompson Meadows Industrial Park as the thirteenth Missouri Certified Site (MCS). The Thompson Meadows property is already a valuable economic asset to the city of Sedalia and the west-central Missouri region. This site now becomes a significant addition to the growing number of Missouri's very best development-ready land sites which have been certified in the MCS program.

We recognize your role as the principal economic development marketer in Sedalia and Pettis County but we pledge to assist your efforts with Thompson Meadows through various offices of the Missouri Department of Economic Development, The Missouri Partnership and the Department's website, currently undergoing upgrades which we expect to enhance the MCS program's visibility and value. To this end, we will look forward to future opportunities to work with you and to provide site marketing assistance whenever possible.

Certification in the MCS program is current for a three year period after which time an abbreviated recertification process is required to continue the Site's certification in the MCS program. Recertification is due at the end of the three-year anniversary month which, as it is late in July, we will fix to the last day of August, 2015.

Sincerely,

A handwritten signature in blue ink, appearing to read "Hal Van Slyck", is written over the word "Sincerely,".
